PREFACE

The QUARTERLY CUMULATIVE INDEX MEDICUS is published four times each year, each temporary number—bound in paper—covering periodicals received during a three months period, each permanent number—bound in cloth—covering the periodicals received during a half year. Issues are published as soon as possible after the completion of the period they cover. The dates of publication are approximately May, August, November and February.

Paper bound copies (those appearing in May and November) should be discarded when the permanent cloth bound issue for the same volume is received.

On pages 43-62 will be found a list of the journals indexed.

The main index is preceded by a list of new books, alphabetized as to authors, followed by a subject classification of the same material.

PREFACE

Le QUARTERLY CUMULATIVE INDEX MEDICUS est publié quatre fois par an: chaque numéro temporaire—relié en papier—comprend les journaux médicaux reçus pendant un trimestre et chaque numéro permanent—relié en toile—ceux d'un semestre. Les numéros sont publiés aussitôt que possible après l'écoulement de la période à laquelle ils s'appliquent. Les dates de publication sont approximativement les mois de Mai, d'Août, de Novembre et de Février.

Les numéros reliés en papier (publiés aux mois de Mai et de Novembre) sont à rejeter comme superflus quand on reçoit les numéros permanents du même volume reliés en toile.

Une liste des publications faisant l'objet de l'index se trouve aux pages 43-62.

L'index est précédé d'une liste de livres nouveaux arrangés par ordre alphabétique du nom des auteurs et suivie d'une classification par sujets.

VORWORT

QUARTERLY CUMULATIVE INDEX MEDICUS erscheint vier mal im Jahre, jede zeitweilige Nummer—geheftet in Papier—enthält die Zeitschriften die im Laufe von drei Monaten ankommen, jede permanente Nummer—gebunden in Leinen—enthält die Zeitschriften die im Laufe eines halben Jahres ankommen. Die einzelnen Ausgaben erscheinen sobald wie möglich nach dem Zeitabschnitt dessen Literatur sie enthalten. Die Zeitpunkte des Erscheinens sind ungefähr: Mai, August, November und Februar.

Die in Papier gehefteten Ausgaben, welche im Mai und November erscheinen, sollten ausgeschaltet werden sobald die permanenten, in Leinen gebundenen Ausgaben desselben Bandes eintreffen.

Auf den Seiten 43-62 ist ein Verzeichnis der klassifizierten Zeitschriften.

Dem Hauptverzeichnis geht eine Liste neuer Bücher voran, zuerst in alphabetischer Ordnung nach Autoren und dann in einem Sachverzeichnis.

PREFAZIONE

Il QUARTERLY CUMULATIVE INDEX MEDICUS si pubblica quattro volte all'anno; ogni numero provvisorio—legato alla rustica—corrisponde a riviste ricevute in un periodo di tre mesi, mentre ogni numero permanente—legato in tela—corrisponde alle riviste ricevute in un periodo di mezzo anno. I numeri si pubblicano appena compiuto il periodo che essi abbracciano. Le date di pubblicazione sono approssimativamente Maggio, Agosto, Novembre e Febbraio.

I numeri legati alla rustica (che si pubblicano in Maggio e Novembre) si dovrebbero scartare appena ricevuti i numeri permanenti del medesimo volume rilegati in tela.

Alle pagine 43-62 si trova un elenco dei giornali classificati.

L'indice principale è preceduto da un elenco di libri nuovi, ordinati alfabeticamente per autori, e seguito da un indice del medesimo materiale ordinato per argomenti.

PROLOGO

El QUARTERLY CUMULATIVE INDEX MEDICUS se publica cuatro veces al año, conteniendo cada número temporáneo—encuadrado a la rústica—los periódicos recibidos durante un trimestre y cada número permanente—encuadrado en pasta de lino—los periódicos recibidos durante un semestre. Los números se publican a la mayor brevedad posible después del vencimiento del período que cubren. Las fechas de publicación son aproximadamente Mayo, Agosto, Noviembre y Febrero.

Los números encuadrados a la rústica (que se publican en Mayo y Noviembre) deben desecharse tan luego como se reciban los números permanentes del mismo volumen encuadrados en pasta de lino.

En las páginas 43-62 se encontrará la lista de los periódicos que están incluidos en el índice.

El índice principal está precedido por una lista de libros nuevos arreglados por orden alfabético de nombres de autores y seguido por una lista de los mismos libros clasificados por materias.

INSTRUCTIONS FOR USE OF QUARTERLY CUMULATIVE INDEX MEDICUS

This periodical indexes itself alphabetically, both as to author and subject entries.

THE COMPLETE BIBLIOGRAPHIC REFERENCE IS TO BE FOUND AFTER AUTHOR'S NAME ONLY. THE TITLES UNDER SUBJECT ENTRIES ARE OFTEN INVERTED; SOMETIMES THEY ARE EXPANDED OR SHORTENED.

Following is a typical citation for an author entry covering an original contribution:

BINET, L., and LUXEMBOURG, F., Etude du pouvoir masculinisateur de l'urine humaine, Bull. et mém. Soc. méd. d. hôp. de Paris 55: 1016-1019, July 10, '39

The citation gives the names of the authors, the title of the article in the original language if English, French, German, Spanish, Italian or Portuguese, or in translation if in other languages. Then follow the abbreviation of the title of the periodical, the volume in black-face type, paging, month (day of month if a semimonthly, semiweekly or weekly publication) and year, in order named, e. g., Bull. et mém. Soc. méd. d. hôp. de Paris 55:1016-1019, July 10, '39.

When there are two or more authors for an article the complete entry as shown appears only under the name of the first author. Under the name of each of the joint authors a cross reference is made to the original author entry, thus:

LUXEMBOURG, F.: See BINET, L., jt. auth.

Russian names appear with various spellings in medical literature; for instance, the name Chernikov, V. V., may appear as Tschernikov, W. W., Tschernikoff, W. W., or Tchernikow, W. W. In this index the spelling followed in Russian publications will be maintained, and a cross reference to the original will be made from unusual variations.

A subject entry is prepared by translation of the title if in a foreign language and by shortening or expanding to emphasize the significant portions. The author entry cited appears as follows in the subject entry:

ANDROGENS

in urine, masculinizing power of human urine; use of female Xiphophorus helleri for detection of male hormone, [L. Binet & F. Luxembourg] Bull. et mém. Soc. méd. d. hôp. de Paris 55: 1016-1019, July 10, '39

In this index, original articles, biographic material and other medical literature of importance are indexed in one alphabet. In searching for a specific article, the author entry should be consulted if the name of the author is known, since the complete bibliographic reference is to be found after the author's name only. In the subject entry of a foreign title a brief English abstract title, indicating the actual content of the article, is substituted for the author's title, when obscure, ill considered or misleading. In unsigned articles, the complete title in the original language as well as a translation will be found under the subject entry. If the subject only is known, the articles should be sought first under the specific word in the title that defines the subject, e. g., ANEMIA; ENDOMETRIUM; HEMIPLEGIA; etc.

Prefixes to chemical compounds denoting numbers of atoms or radicals, or their positions, such as mono, di, tri, ortho, meta and para, are alphabetized under the essential constituents, the prefixes being ignored as far as alphabetical arrangement is concerned. For instance, *p*-Aminobenzenesulfonamide appears in the Index under "A" as *p*-AMINO BENZENESULFONAMIDE, and diHydroxyphenylalanine under "H" as diHYDROXYPHENYLALANINE. Likewise, figures representing the position of radicals or side chains are also ignored in the alphabetical classification. Exceptions to this rule include trade names and names of official drugs as, ACID, trichloroacetic; TETRACHLOROETHYLENE.

Articles with titles equivalent to the capitalized heading appear immediately beneath the subject entry with the name of the author only; then unclassified titles in alphabetical order precede the articles grouped under subclassifications. Standard subheadings for diseases and organs are as follows:

FOR DISEASES

blood in
complications and sequels
diagnosis
epidemiology and statistics
etiology and pathogenesis
experimental

heredity
history
immunity
in infants and children
metabolism in
mortality

pathology
prevention
prognosis
therapy
transmission

FOR ORGANS

abnormalities
abscess
absence
anatomy and histology
blood supply
calculi
cancer
cysts
diseases
diverticula

echinococcosis
embryology
examination
foreign bodies
gangrene
hemorrhage
infarction
innervation
pathology
perforation

physiology
roentgenography
rupture
surgery
syphilis
tuberculosis
tumors
ulcers
varix
wounds and injuries

Literature referable to organs and regions of the body is classified under the particular organ or region, e. g., BRAIN, abscess; STOMACH, cancer; FEMUR, fractures.

Articles on the action of a drug in general or the method of administering it are indexed under the name of the drug; but articles on the action of a drug in a particular disease are indexed under the disease; e. g., an article on the action of quinine is indexed under **QUININE**, while an article on quinine therapy of malaria is indexed under **MALARIA**, therapy with a cross reference from **QUININE**, therapy.

Numerous cross references are supplied from specific names of organs, from diseases, from eponyms, etc.

While the general scheme of indexing in this publication classifies the literature according to a specific arrangement, some subjects are, of necessity, grouped under broad, general headings. A representative list follows:

Acid
Anesthesia
Apparatus
Arteries
Bacteria
Contracture
Fistula

Hospitals
Jurisprudence, Medical
Medicine
Muscles
Nerves
Obituaries
Paralysis

Reflex
Sarcoma
Tumors
Vital Statistics
Workmen's Compensation
and Insurance
